

FINISH CARE AND MAINTENANCE

Watermark Designs faucets are high quality products made from solid brass. *Watermark Designs* has prepared the following care information to help keep your faucet free from tarnish and looking like new. Please read it carefully before your hardware is installed.

To help ensure the beauty of brass faucets, never install an item until construction is almost completed and after:

- Workmen have finished treating nearby tile or marble with acid or chemicals.
- The air conditioning or heat has been turned on.
- The room has been painted or stained.

To prolong the life of the protective coating and delay the refinishing process, follow these guidelines:

- Do not install your faucet with Plumber's Putty. If you intend to use a sealant, use a non-corrosive 100% Silicone. No other type of sealant is acceptable.
- Avoid contact with newly applied paint, thinner or other harsh solvents.
- To clean, wipe your faucet with a soft cloth dampened with mild soapy water.
- Do not use chemical cleaners or any product with ammonia (i.e. Glass Plus, Windex, or 409).
- Avoid hitting your hardware with rings or other sharp instruments.
- It is important that you keep the faucet dry. Elements in water remaining on the faucet can break down the finish.
- Avoid contact with cosmetic products, such as shaving cream, nail polish remover or colognes.

If you need further assistance concerning a particular finish or tarnishing situation, please feel free to contact our Customer Services Department at: 718-257-2800. Our knowledgeable Service Representatives will be happy to assist you. Your local *Watermark Designs* distributor will also be glad to offer his support.
