

POTTERYBARN

CLASSIC BATH MIRROR

Important Safety Instructions:

- Please read all instructions carefully before assembling.
- For your safety, assembly by two or more adults is strongly recommended.
- Keep instructions for future use.
- Use only vendor supplied hardware to assemble. Using unauthorized hardware could jeopardize the structural integrity of the item.
- This hanging system is meant for drywall/stud mounting only.
- If walls are concrete, brick or plaster, please consult your local hardware store for assistance.

Pre-assembly:

- Remove all parts and hardware from the box and lay out on a clear carpeted or scratch-free work surface, as this will avoid damaging parts during assembly. The shipping box provides an ideal work surface.
- Do not dispose of any packaging or contents of the shipping carton until assembly is completed to avoid accidentally discarding small parts or hardware.
- Use the parts and hardware lists below to identify and separate each of the pieces included.
- The illustrations provided allow for easier assembly when used in conjunction with the assembly instructions.
- The use of power tools to aid in assembly is not recommended. Power tools can damage hardware and split wood.

Parts Included:

(A) Mirror 1 x

Hardware Included:

<p>(B) Toggle Anchor Dia. 14*42mm</p>  <p>2 x</p>	<p>(C) Toggle Screw Dia. 4*38mm</p>  <p>2 x</p>
--	--

Tools Required (not included):

Stud Finder
Level
Tape Measure

Mounting Instructions:

This item includes four D-rings on the back for wall-mounting. The item may be hung on a wall in either of two orientations. Only two D-rings are used. Select a desired orientation and keep track of the corresponding D-ring pair for that desired orientation. Before you get started, use a tape measure to measure the distance between the two selected D-rings (measure from the center of each D-ring). This distance is referred to as "Measurement (A)".

The hardware included with this item is meant for drywall or stud mounting only. If your walls are made from concrete, brick or plaster, please consult your local hardware store for assistance in selecting the appropriate hardware.

- 1) At a desired location and with the help of another person, hold the item against the wall **so that the rear surface faces away from the wall and you can see the D-rings**. Use a level to make sure the item is level and then mark the wall at the same height as the two selected D-rings so that the wall marks align horizontally with the two selected D-rings. Set the item aside.
- 2) Use the level again to make sure that the two marks of Step(1) are level with respect to each other and adjust them if necessary. Connect the two marks with a light straight pencil line.
- 3) Use the pencil to make two marks centered along this line that are spaced apart a distance equal to "Measurement (A)". These two marks are the locations for the hanging hardware.

Note: If either of the two marks of Step (3) aligns with a wall stud (use a stud-finder to determine this), use a screwdriver to secure a screw at this mark directly into the wall and stud - do not use an anchor at the stud location. Rotate the screw clockwise until the screw head is about 3/8 inch from the wall. This protruding portion of the screw will engage one of the two D-rings located on the back of the item.

- 4) For marks that do not align with a stud, use a Phillips screwdriver to install a toggle into the wall. To do this, position the tip of the toggle against the wall at one of the marks and then gently push the toggle into the wall as you rotate it clockwise. The anchor is designed to drive itself into the wall as it is rotated. Continue rotating the toggle until the wide end becomes even with the surface of the wall. Repeat this step with the other anchor and mark.
- 5) Use the screwdriver to secure a screw into each installed toggle. Rotate the screw clockwise until the screw head is about 3/8 inch from the wall.
- 6) Preferably with the help of another person, lift the item so that the two selected D-rings align with and engage the protruding screw heads. Gently lower the item so that the screws support its full weight. Make sure that each screw is completely engaged with its D-ring before releasing the item.

Care Instructions:

- Wipe with a soft, dry cloth.
- Do not use any abrasive or chemical household cleaners.
- A household glass cleaner may be used to clean the mirror, but apply the cleaner to a clean cloth first and then use the cloth to clean the mirrored surfaces. Avoid spraying the cleaner directly onto the frame of this item.
